

Figure 1 is a plot showing Airmass (Y-axis, ranging from 0.5 to 3.0) versus UT (X-axis, ranging from 16:07 to 14:37) and MJD (X-axis, ranging from 58946.0 to 58946.0). The plot displays two curves: MMT Airmass (green line) and Magellan Airmass (red line). The MMT Airmass curve starts at approximately 3.0 at 18:37, reaches a minimum of about 1.2 at 21:07, and then rises to about 1.5 at 23:37. The Magellan Airmass curve starts at approximately 2.7 at 16:07, reaches a minimum of about 1.1 at 20:07, and then rises to about 1.5 at 23:37. Shaded regions indicate observation times: Magellan Night (pink shaded region, 23:37 to 02:07) and MMT Night (green shaded region, 09:37 to 12:07).
